## Skills

Management, Training, Recruiting, Cash handling, Inventory control, Payroll

HTML, CSS, C++, JavaScript, MySQL, ReactJS, NodeJS, Bootstrap, GitHub, JSON, JSX, Front-end Development, Back-end Development

## Experience

September 2019 - Present

### **Freelance Web Developer**

- Developed and built landing pages for clients, I specialize in turning a design into reality.
- Focus is on responsive web design for all devices.
- I manage time efficiently when working on all projects.
- Provide feedback to clients on design and layout of pages
- Currently working in the ReactJS framework.

July 109 - Present

### **Chip Cookies - Manager**

- Full-Time Manager
- I handle all operations for the store. My responsibilities include: Opening and closing the store, handling cash, inventory, hiring and training.
- I took this position when the store was fairly new and I transformed it into the best performing stores and continue to break records for sales.
- I put hard work and dedication into making the store the best it can be, and I apply the same methods to all aspects of my life.

June 2017 - July 2019

### **Main Street Pizza - Manager**

- Part-Time Manager
- My responsibilities include: Opening and closing, handling cash, inventory, hiring and training.
- While working here and going to school, I developed a small application that handled our inventory and ordering. It was never implemented, but I presented it to the owner and he loved the design and how it worked. It was built using C++.

## Education

August 2017 - April 2019

### **Snow College - Associate of Science**

I attended Snow College for 2 years, I'm working towards a degree in Software Engineering. I took classes learning C++ and Java.

August 2019 - Present

### **Code Cademy - Web Development Career Path**

I have completed all my Courses on Codecademy's website which include learning - Code Foundations, Git, Command Line, Building Interactive Websites and Web Development.
